CORE SKILLS

Python 3
Go
Asyncio / aiohttp
FastAPI, Flask
PostgreSQL, MongoDB
Kafka, RabbitMQ
Kubernetes, Helm
GCP, AWS
Prometheus, Grafana
CI/CD

EDUCATION

M.S. Computer Science
Columbia University
2018

B.Eng. Software Eng.
University of Lagos
2016

CERTIFICATIONS

Certified Kubernetes Application Developer (CKAD), 2022

Profile

Backend engineer (5+ yrs) building high-throughput distributed systems in Python and Go. I care about reliability, observability, and clean APIs.

Experience

Backend Engineer II
Streamline Payments, New York | 2021 - present
* Own the payment-routing service (Python/asyncio) processing ~$40M/day at 99.99% uptime.
* Designed a Kafka-based event pipeline replacing nightly batch jobs; settlement now near real-time.
* Cut cloud spend 22% by right-sizing Kubernetes workloads and adding autoscaling.
* Wrote the team's incident-response runbook; led 15+ postmortems.

Software Engineer
Gridline Analytics, New York | 2018 - 2021
* Built Flask and FastAPI services for an energy-forecasting product used by 30 utilities.
* Rewrote a hot-path ingestion worker in Go, increasing throughput 6x.
* Introduced structured logging and Prometheus metrics across 12 services.

Selected Projects

* pg-migrate-lite - open-source zero-downtime PostgreSQL migration helper (900+ GitHub stars).
* Speaker, PyGotham 2024: "Backpressure in asyncio services".
